

Title

Refactoring the code base

Strategic direction

Technical Debt

Is your proposal related to a problem?

YES! Legacy code which affects performance & can be confusing to manage, maintain and fix.

Describe the solution you'd like

merging tables of permission logic
merging modules & spaces which overlap
~~XXXXXXXXXXXX~~

Describes in steps how it should work

Extracting calls
merging sub tables
creating one space or module
(maybe & conferences)

ONE EXAMPLE!

Analyzing spaces (Assemblies, Package spaces)
Permission logic which be some

Merge or reuse the code in those spaces.
