

Title

~~Expand~~ Expanding participation digital territories

Strategic direction

Expand Interoperability

Is your proposal related to a problem?

Strong focus on web

Expand interfaces and contexts where people can participate on decision processes

Describe the solution you define

Facilitate the process of using small portions of the interface, ~~including messaging apps~~, on other digital contexts and territories, including on messaging apps.

Describes in steps how it should work

- ① admin creates the widget/interface components/ or messaging flow
- ② copy code and use at the other environment
- ③ The integration is managed by admin
