Citizen opinion survey and free comments

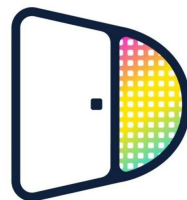

1,769 items

The recommendations emphasize the importance of realizing regional traffic safety and a comfortable travel environment, improving transportation options for seniors and residents, revitalizing commerce around Kakogawa Station, promoting pet coexistence, environmental improvement, transparent administrative management, sustainable urban development, promoting intergenerational coexistence, improving the area's appeal, and citizen participation. Each opinion group seeks to improve the safety, convenience, and living environment of the area, and is calling for specific measures and for citizen opinions to be reflected. Particular emphasis is placed on support for seniors and those raising children, and on utilizing local resources. Active citizen involvement is seen as the key to revitalizing the area.
